

# JOE YANG

Seattle, WA | 206-851-6639 | [joe.yang.dev@gmail.com](mailto:joe.yang.dev@gmail.com) | github: [jyang81](#) | blog: [medium.com/@jyang81](https://medium.com/@jyang81) | LinkedIn: [/in/joe-yang](#)

Full stack web developer with a hunger for learning and building things that improve people's lives. With experience in Ruby on Rails, JavaScript, and React and a background in graphic design, I discovered web development through my passion for solving problems. I bring strong skills in creative thinking and project management to help forward-thinking companies connect with their target audience to make a positive impact.

## TECHNICAL PROJECTS

**BaseCamp** - [Github](#) | [Demo](#) (email: [demo@demo.com](mailto:demo@demo.com), pw: demo)

*A coding bootcamp dashboard app that helps students stay organized and track their progress during their program*

- Created Rails API server to host the backend, following REST protocol
- Utilized React to develop the frontend
- Implemented JWT authorization to log in users
- Incorporated Semantic UI and CSS Grid to style and structure components

**Green Up! Seattle** - [Github](#) | [Demo](#)

*A waste management app designed to educate Seattle residents about proper waste disposal through gamification*

- Utilized Ruby on Rails with an MVC framework
- Built a PostgreSQL database using ActiveRecord
- Used Bcrypt for password encryption
- Implemented Bootstrap CSS for styling of elements

**React Pictionary** - [Github](#) | [Demo](#)

*A real-time multiplayer drawing game where players try to guess the word the artist is drawing*

- Created Rails server with a REST API
- Utilized React to build the frontend, with Canvas for in-browser drawing functionality
- Made use of web sockets using ActionCable to broadcast real-time drawing and chatting
- Used Semantic UI to style components for a consistent user experience

## TECHNICAL SKILLS

Ruby, Rails, JavaScript, React.js, SQL, PostgreSQL, AJAX, HTML5, CSS3, Bootstrap, Semantic UI, Github, Adobe Creative Suite
